## Y General Information

### **SIMULATOR:**

EMB145FFS  
 Manufacture: CAE Inc. Montreal, Canada  
 Computer: IBM PC X235  
 Certification: Level D, Semi-Annually qualified by CAAC  
 In Service Date: 2005.6  
 Location: Zhuhai, Guangdong, P.R. of China

### **VISUAL:**

Manufacturer: CAE Inc. Montreal, Canada  
 Computer: Three 19-Inch Rackmount Industrial PCs  
 Type of Image Generator: TROPOS 300  
 Type of Display: BARCO 5064 Field of View: 40°×180°  
 Illumination Levels: Day/Dusk/Dawn/Night

### **INSTRUCTOR STATION:**

Manufacturer: CAE Inc. Montreal, Canada  
 Computer: 2 NCD Color HMX X-Terminal Computer  
 Type: 2x15" color touch-sensitive LCDs and additional pushbuttons

### **MOTION AND CONTROL LOADING:**

Manufacturer: CAE Inc. Montreal, Canada  
 Type: CAE 600 Series with Digital Motion and Control Loading, Motion 6 DOF

### **SPECIAL TRAINING AIDS:**

TCAS: Available  
 ACARS: Available  
 GPS: Available  
 ATIS: Available  
 EGPWS Available  
 Windshear training: Available  
 Number of Malfunctions: More than 220  
 Automated Lessons for: Transition training  
 Base Check  
 Line Oriented Flight Training (LOFT)  
 Recurrent  
 Customer specified lessons available on request

## Y General Information

cont'd

### **DATA PACKAGES:**

Aerodynamic Data Revision:	EMB Docment 145-AD-304 Vol 6 Aero Data Bank Version 3L
Engine Model and Data Revision:	Allison Engines AE 3007A1 CAE Performance Model FADEC version 7.6
Flight Controls Data Revision:	EMB Docment 145-AD-304 Vol 4 EMB Docment 145-AD-304 Vol 6 Hinge Moment Data Version 3E
Flight Management System:	Dual Universal 1K  Single Honeywell Primus NZ-2000

### **SIMULATATED AIRPLANES:**

Airplane Model:	EMB-145
MTOW:	22,000KGS
MLW:	193,00KGS
MZFW:	17,900KGS
Attitude Callouts:	500,100,50,40,30,20,10,Minimums Different Callout types are available on request
Cockpit Layout:	EMBRAER EMB-145 tail number 701

### **AIRCRAFT TYPE / ENGINE:**

Engine Manufacturer:	Allison Engines
Supplied Combinations:	EMB-145 with AE3007A1

## Y Visual Databases

Following airports are selected from the instructor station for training:

### Real airports

Chiang Kai Shek Intl	(RCTP)	Narita/Tokyo	(RJAA)
Kansai Intl	(RJBB)	Fukuoka	(RJFF)
Tokyo Intl	(RJTT)	Seoul/Incheon	(RKSI)
Manila/Ninoy Aquino Intl	(RPLL)	Hong Kong Intl	(VHHH)
Macau	(VMCC)	Bangkok Intl	(VTBD)
Soekarno-Hatta Intl	(WIII)	Singapore/Changi (WSSS)	(WSSS)
Beijing/Capital	(ZBAA)	Guangzhou/Baiyun	(ZGGG)
Guilin	(ZGKL)	Zhuhai/Sanzao	(ZGSD)
Shenzhen/Huangtian	(ZLSZ)	Xi'an/Xianyang	(ZLXY)
Kunming/Wujiaba	(ZPPP)	Gaoqi/Xiamen	(ZSAM)
Hangzhou/Jianqiao	(ZSPD)	Shanghai/Hongqiao	(ZSSS)
Chongqing	(ZUCK)	Guanghan	(ZULS)
Chengdu	(ZUUU)	Urumqi/Diwopu	(ZWWW)

### Generic airports

Generic airport is reconfigurable, allowing the instructor to create a variety of training environments through the simple manipulation of database elements, such as mountains, cities, terminals, PAPI/VASI...

#### Note:

Most of the real airports are aligned properly for training. However, Xiang Yi does not automatically update those airport databases to reflect changes to the airport and its environment that may affect the certifiability of a particular database.

Most airports, which are not listed above, can be made available as a generic airport.

If the customer requests "Real Airports" not yet available, Xiang Yi Flight Training is willing to implement each other database for which the customer will be charged additionally. However, this implementation will take a certain time.

For more details please contact Xiang Yi Flight Training's responsible Engineering Department.

## **Y Navigation Database**

The present used navigation database is base on the training for China Southern Airlines pilots.

On request it might be possible to use different databases, if they are compatible to our system.

However, the use of different navigation databases has to be agreed with Xiang Yi Flight Training's engineering department in advance.

## Y Instructor Station Layout

## Y Cockpit Layout

### Captain's Panel

# Y Cockpit Layout cont'd

## First Officer's Panel

## Y Cockpit Layout cont'd

### Pilot's Lightshield and Center Panel

# Y Cockpit Layout cont'd

## Overhead Panel

# Y Cockpit Layout cont'd

## Pedestal Panel

## Y Aircraft Avionic

<b>Original Aircraft Box</b>	ACARS
	DU
	RMU
	AWU
	IC-600
	FMC/CDU NZ2000 (Alternate Config)
	CDU (Alternate Config)
	NAV Computer
	NAV CDU
	EGPWS
<b>Simulated Aircraft Box</b>	HSCU
	AHRS(900 and 800)
	ADC
	CMC
	SPC
	DAU
	FEDAC

### Avionic Options

Some of the above listed LRU's offer options which can be activated according to customer's individual requirements. The present avionic standard is based on China Southern's aircraft and hence might deviate from customer's avionic standard (eg. Automatic call-outs, indication of imperial or metric-units etc, ...). Xiang Yi Flight Training is able to activate several of these options to fulfill customer's individual requirements.

## Y Technical Responsibility

For additional information on all technical simulator aspects and for discussion of your specific customer setup please contact the responsible engineering department.
